

Solar Proponent LLC – Financial Analyst/Senior Financial Analyst

The Company: Solar Proponent LLC

Solar Proponent is bringing the scale of traditional energy investment to utility scale solar development. With the firm financial backing of the world's premier energy venture investor, and a clear plan for bringing billions of dollars of new investment to US solar assets, we are building an extraordinary team of creative problem solvers to help make this vision a reality.

Solar Proponent LLC is an EnCap Energy Transition Fund portfolio company. EnCap Investments is the leading provider of venture capital to independent energy companies (www.encapinvestments.com). Active since 1988, EnCap has raised \$37B in capital commitments for deployment into 240 portfolio companies in the energy and power space.

The Position: Senior Financial Analyst

Reporting to the Chief Development Officer and supporting a team of development specialists, the Senior Financial Analyst leads the financial assessment and ranking of acquisition targets and new project site opportunities, leads the creation of investor delivered analysis and explanation to support our financing structure, and assist with the creation and automated update of intelligence databases.

Responsibilities

- Maintain an industry up-to-date base project finance model and version control
- Research, recommend, and implement modeling changes to align with investor expectations
- Create and manage a system of global/project specific inputs to support comparison and ranking of project acquisition targets and prospective project sites
- Create financial analysis and explanatory documentation to support project sale
- Research, utilize, and defend market projections and assumptions used in financial modeling
- Support the Director of Interconnection in creation and maintenance of ERCOT pricing database
- Write or manage the execution of Python scripts to automate the update of inhouse databases from ERCOT / NREL / SAM, write database queries to draw down regularly referenced data

Required Skills and Experience:

- 3+ years' project modeling experience with 1+ year with solar project finance experience
- Master level proficiency with MS Excel. Advanced proficiency with MS Word and PowerPoint. Proficiency with MS SQL. Proficiency with Python scripting to support database updates preferred but not required
- Comfort with high levels of individual autonomy and personal responsibility
- Must be living in, or willing to relocate to, Austin, TX

If you are a great candidate for this role, please send your resume to jobs@solarproponent.com.
